

SURGICAL SERVICES OPERATIONS

PRE-OP TO 5 SOUTH MOVE

Starting November 27, the next phase of the OR will begin requiring the relocation of Pre-op to 5 South. Once this phase is complete, a total of 16 rooms/bays will be available for both PACU and Pre-op until the final OR project is finished.

Until the end of 2017, all patients scheduled for surgery at 0730 and 0800 will be prepped in the current 1 South pre-op space and then will transition to the finished space shown below.

After surgery cases prepped for 7:30 or 8:00 a.m. procedures transfer to the operating room, pre-op will transition to 5 south. These 6 rooms (514, 515, 517, 519, 520, and 521) are each semi-private and can accommodate 2 patients.

There will be a dedicated nurses station and omniceil location. In addition, a dedicated elevator that will go between 1south and 5south will be available.

Last, patients needing specialty procedures prior to going to the operating room, i.e. epidurals and art lines will have those completed on 1 south to assist with a smoother direct transition to the operating rooms.

Vision

Methodist Health System will be the Surgical Centers of choice for patients, physicians, and staff.

New Partial PACU and Pre-op

This figure shows the partial PACU and Pre-op new construction. We will take full possession after the first of the year. The rooms that will be available for use are numbered 1-16 above. These numbers indicate the number of rooms, and not the final room number.

5 South Preop Layout

This figure shows the room layout on 5 south. Room H5518A will be the Nurses station, and Room H5551 will have the omniceil.

Next Steps!

We are meeting weekly preparing for this move including staff and provider orientation.

Several walk through exercises are planned to assure a smooth and safe transition.
