

Radiology Decision Support

When selecting radiology orders for **CT**, **MRI**, and **Nuclear Scans** a Decision Support tool will display.

1. Based on specificity of the diagnosis entered, you may have to select or type a reason for exam within the decision support tool.

2. Once reason for exam is selected, the tool will provide appropriateness or suggested alternatives in the decision support window on the right.

3. **Display Evidence** link provides detailed rationale for appropriateness scores.

4. You can confirm the original order and indicate why you kept the original order.
